

Red Hat

GuardDog AI + RedHat Partner Program 2026

Activate. Accelerate. Win Together

Who We Are – Trusted Innovators in Cybersecurity

Founded in 2019 and based in Salt Lake City, Utah, GuardDog AI is dedicated to revolutionizing cybersecurity by democratizing enterprise-grade protection through agentic AI-driven security solutions. We empower organizations worldwide to confidently secure hybrid, multi-cloud, and edge environments, enabling seamless innovation and scalable growth without compromise.

- **Proven Effectiveness:** More than 284,000 intrusion attempts automatically contained in real-world deployments.
- **Award-Winning Innovation:** Recognized by ASTORS, Cybersecurity Breakthrough Awards, and Red Hat for leadership in container security.
- **Enterprise-Ready Integration:** Certified with Red Hat UBI and fully integrated with Kubernetes and OpenShift for effortless deployment.
- **Trusted by Leaders:** Adopted by MSSPs, healthcare networks, SaaS providers, and diverse enterprises across multiple industries.
- **Significant Impact:** Customers experience up to 200x faster threat isolation while reducing toil and operational overhead by 65%.

At GuardDog AI, we continuously push the boundaries of AI-powered cybersecurity—so your teams can focus on driving innovation rather than firefighting threats.

Why We Win with Partners

GuardDog Complete delivers unmatched protection against sophisticated edge threats that traditional security solutions consistently miss.

Our autonomous, real time AI detection and agentic containment creates competitive advantage through comprehensive defense across all digital environments.

Partner-first isn't just our strategy—it's embedded in our DNA and drives every business decision we make.

Strategic Leverage

Your industry expertise and trusted client relationships expand our market presence exponentially. Together, we create security solutions tailored to specific market needs.

Mutual Growth

Our 100% partner-centric model ensures your success directly drives our collective growth. We've engineered our entire business ecosystem to maximize your profitability.

Market Dominance

Partners who lead with GuardDog secure long-term competitive advantage in the rapidly evolving cybersecurity marketplace, becoming trusted security advisors.

Who We Serve – Real Problems, Real Results

GuardDog AI partners with security-conscious organizations facing modern challenges in complex IT environments. Our solutions drive measurable improvements in risk reduction, operational efficiency, and compliance.

CIO – Enterprise Retail

Problem: Hybrid infrastructure complexity created security gaps between on-premises and cloud.

Solution: Combined GuardDog AI and Red Hat provided unified container visibility and real-time containment, cutting incident response from hours to seconds.

VP of DevSecOps – SaaS Provider

Problem: Security processes slowed down CI/CD pipelines blocking frequent deployments.

Solution: Sidecar deployment enabled embedded, automated detection and policy enforcement across build → deploy → run stages, enabling secure and frictionless releases.

CISO – Healthcare Network

Problem: Overwhelming false positives hindered threat prioritization and compliance.

Solution: AI-driven anomaly detection with 95% automation reduced alert noise, allowing teams to focus on strategic initiatives and improve compliance reporting by 75%.

Director of IT – MSSP

Problem: Managing multiple client environments lacked centralized visibility and control.

Solution: GuardDog AI dashboard offers multi-tenant, fabric-wide analytics, enabling efficient exposure management, delegation, and scalable client security operations.

The Modern Security Challenge- AI-Driven Security Without Compromise

Complexity

Multi-tenant environments spanning on-premises data centers, public clouds, and edge deployments create a sprawling, difficult-to-secure infrastructure landscape. OpenShift accelerates deployment but requires matching security capabilities.

Operational Toil

Security analysts are overwhelmed by false positives and manual triage processes, leading to alert fatigue and missed threats. This diverts resources from strategic security initiatives.

Market Dominance

Partners who lead with GuardDog AI secure long-term competitive advantage in the rapidly evolving cybersecurity marketplace, becoming trusted security advisors.

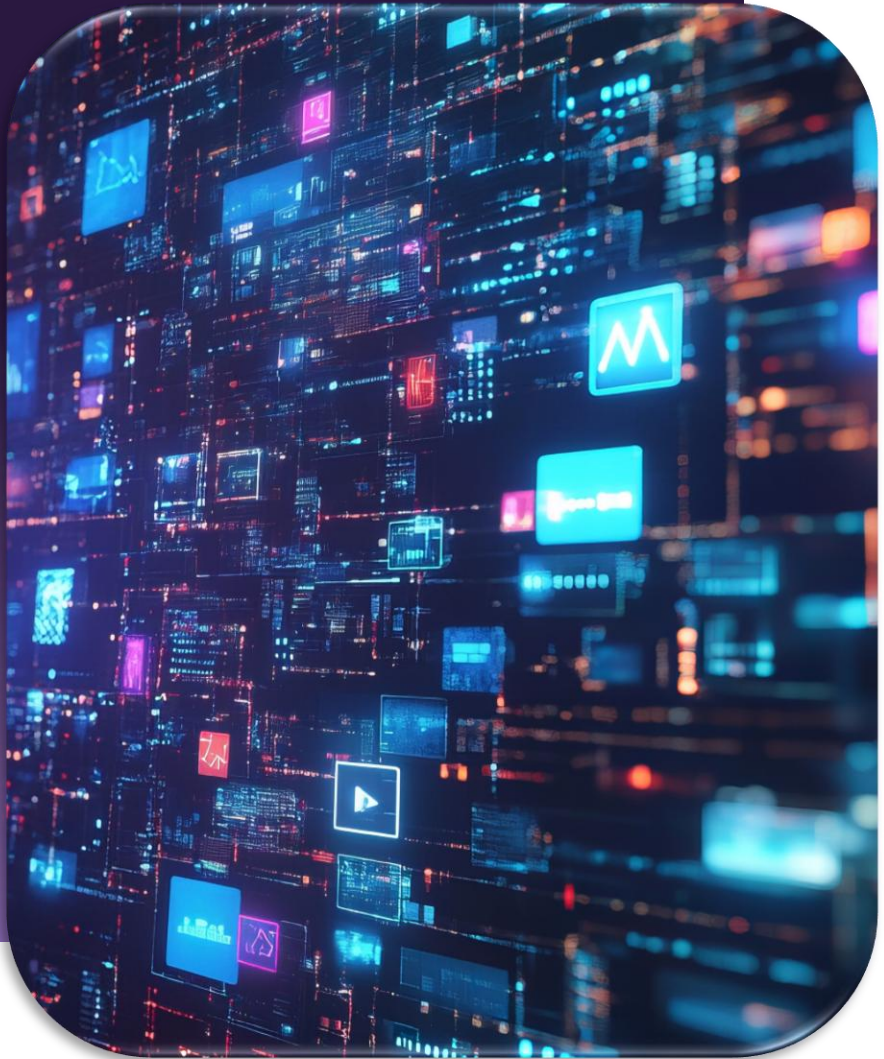

Deployment and Response Delays

Legacy tools take hours to contain threats, while containers can be compromised in minutes, creating a detection gap. In CI/CD, security bottlenecks cause deployment delays, slow innovation, and increase toil by forcing controls to be added later instead of upfront.

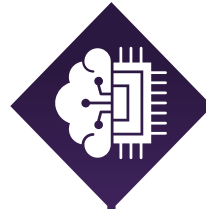

Powerful security innovation meets enterprise-grade infrastructure to deliver real-time threat detection and autonomous containment across hybrid environments.

Designed for the complexity of modern enterprises with distributed workloads across cloud, on-premises, and edge environments.

Product Overview : GuardDog Complete

AI-Powered Detection

Advanced machine learning algorithms identify anomalous behavior and potential threats before they cause damage.

Intelligent Isolation

Compromised assets are automatically quarantined to prevent lateral movement and contain potential breaches.

Continuous Protection

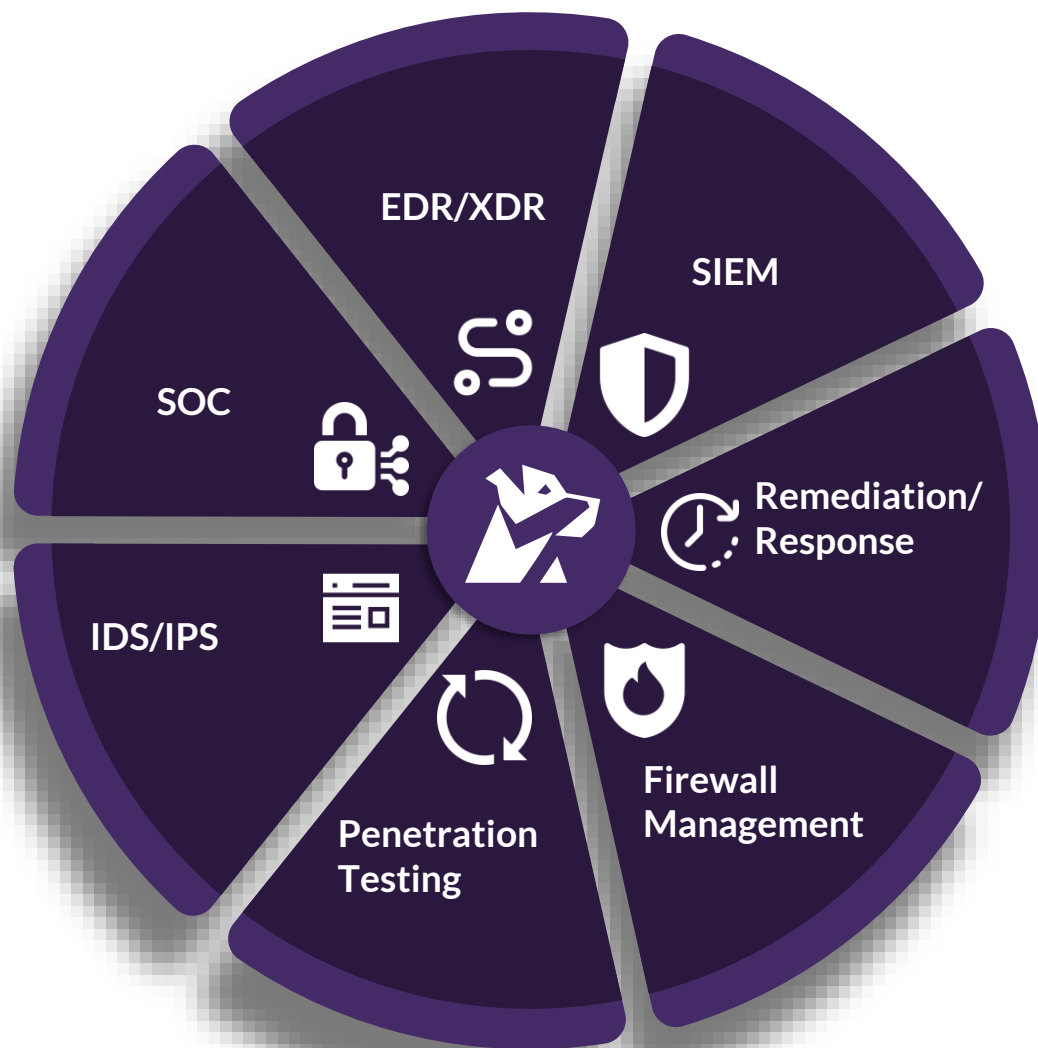

Real-time behavioral telemetry and automated response mechanisms ensure persistent security across all environments.

Built for scale across remote workforces, IoT deployments, and hybrid cloud environments, GuardDog Complete delivers enterprise-grade security with simple deployment and management.

Automated Agentless Agentive AI Containment

Adds to other Tools for Complete Incident Response Plans

Guard Dog Complete Platform Automated Approach Compared to Common Tools

NDR/XDR	63%
EDR	40%
SIEM	50%
IDS/IPS	86%
SOC	82%
NOC	56%
MDR	80%
Pen Test	70%
Guard Dog AIR	100%

GuardDog Complete + Red Hat Deliver:

Agentic Containment

Security that acts autonomously, not waits for human intervention

Attack Surface Management

Complete visibility across containers and hybrid workloads

Comprehensive Visualization

Embedded sensors providing actionable security intelligence

Toil Reduction

Measurable business outcomes through automation

Enterprise Scale

Seamless protection across hybrid cloud and edge environments

Red Hat Collaboration Benefits

Operational Impact

Reduced toil, lower operational cost, faster compliance certification.

Co-Engineered Growth

Targeting edge, IoT, DevSecOps, and emerging AI workload protection.

Ecosystem Leverage

Red Hat enterprise trust combined with GuardDog AI innovation.

Revenue Expansion

Cross-sell via Red Hat subscriptions with GuardDog AI as a competitive differentiator.

Customer Satisfaction

Embedded security within Red Hat deepens integration and makes churn less likely.

Service Differentiation

Offer unique, autonomous, real-time AI detection and agentic containment.

GuardDog AI: Real-Time Container Security Revolutionized

GuardDog AI revolutionizes container security through continuous, intelligent monitoring and instantaneous threat response. While competitors rely on vulnerable periodic scanning approaches, our innovative sidecar deployment architecture delivers unmatched real-time protection throughout your container ecosystem.

Technology-Led Growth Model:

- Frictionless integration with existing environments.
- Advanced behavioral analysis algorithms that detect even sophisticated zero-day threats.
- Industry-leading millisecond threat detection paired with real-time automated response.
- Non-intrusive monitoring architecture with zero measurable performance impact.

Business Benefits:

- Cut security incident resolution time by 85%, drastically minimizing potential damage and safeguarding your organization's reputation.
- Ensures comprehensive compliance with GDPR, HIPAA, PCI-DSS and other industry regulations.
- Simplifies complex security management through an intuitive, actionable dashboard.
- Delivers significantly lower total cost of ownership compared to traditional security solutions

Autonomous, Predictive, and Personal

Our revolutionary approach outperforms traditional security solutions across multiple dimensions

GuardDog AI

- Sidecar deployment within L2/L3 network for **seamless integration** with minimal overhead
- **Real-time** continuous monitoring using advanced behavioral analysis algorithms
- **Instant** threat isolation through automated containment Protocols
- **No write access required**, maintaining zero-trust security principles
- ML-powered anomaly detection with **sub-second response times**
- **Kubernetes-native architecture** that scales horizontally with your infrastructure
- **Comprehensive API integrations** with existing security tools

Competitors

- External scanning architecture requiring additional network access
- Point-in-time snapshots leaving critical security gaps between scans
- Delayed response times averaging 15-30 minutes after detection
- Requires policy modifications that increase administrative overhead
- Limited machine learning capabilities with high false positive rates
- Performance degradation in large-scale deployments
- Fragmented integration with DevOps workflows

GuardDog AI's revolutionary approach delivers up to 200x faster threat detection and response while reducing operational overhead by 65% compared to traditional solutions!

Cloud-Native Automation, Extended to the Edge with GuardDog Complete

Traditional automation stops at the cloud — GuardDog Complete extends automation and security to the edge, protecting IoT, legacy, and hybrid environments without agents or re-architecture. Our partner-enabled services deliver comprehensive protection across your entire digital ecosystem.

Partner Value Add

Agentic Containment

Hybrid/multi-cloud design, strategic sensor placement, and business continuity planning that maximizes coverage while minimizing deployment complexity.

Networking & Firewall Services

VLAN design, ACLs, SPAN/mirroring configuration, and performance optimization tailored to your network topology and security requirements.

Virtualization & Host OS Management

Expert implementation across VMware and Linux environments with automated patch cycles to maintain security posture.

Containerization & Kubernetes

Hardened namespaces, secure cluster deployments, and Docker networking configurations that follow Red Hat best practices.

SDN & Cloud Services

NSX implementation, IAM configuration, troubleshooting, and cloud automation that ensures consistent policy enforcement.

Third-Party Software Integration

Seamless SIEM integration, 24/7 monitoring services, and proactive threat hunting to extend your security operations.

How It Works: Key Differentiators

Frictionless Integration

Syslog, RESTful APIs, and Webhooks enable rapid integration, trigger automated response workflows, and connect GuardDog Complete to SIEM, SOAR, and ITSM systems for closed-loop security operations.

Autonomous Operation

GuardDog Complete continuously detects attacks, isolates compromised assets, and mitigates risk in real time — eliminating the need for manual intervention and accelerating response.

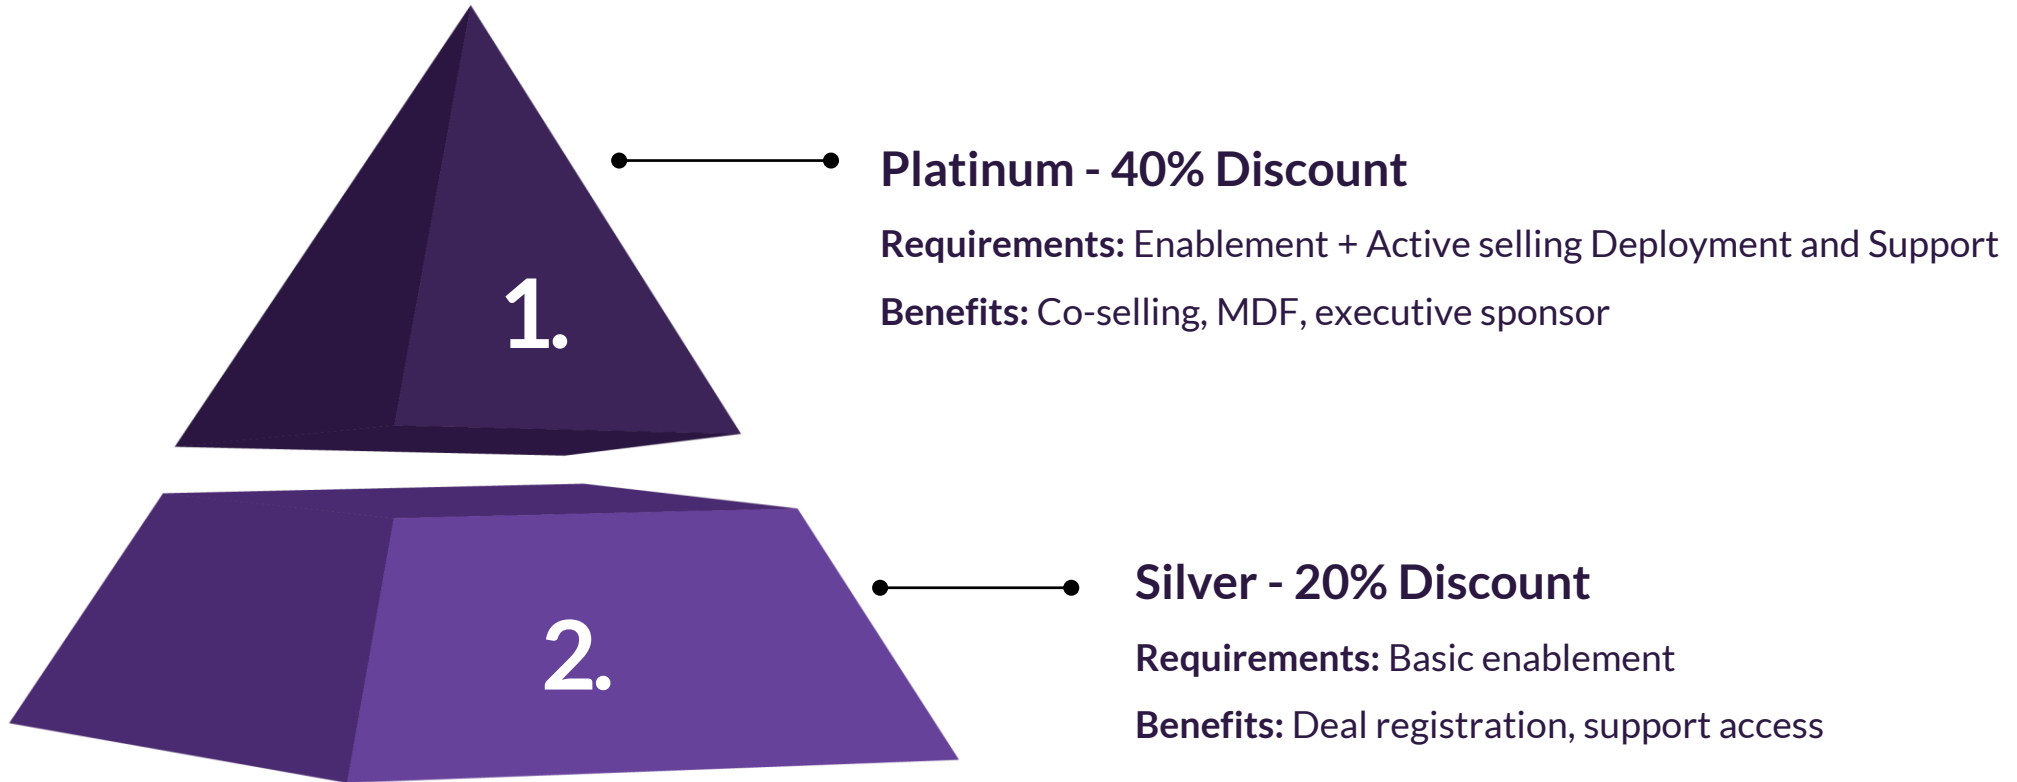

Agentic Architecture

Deploys without re-architecture, delivering intelligent, proactive protection and frictionless adoption across cloud, data center, edge, and devices that traditional agent-based solutions couldn't protect.

Partner Program Structure

Launch Year – No Commitments, Maximum Rewards

Our tiered structure balances accessibility with rewards for deeper engagement. Unlike traditional programs, we've eliminated volume commitments in 2025 to make it easier for partners to succeed immediately.

Advanced Partner Tiering Details

1.

Platinum Partner (40%)

During our launch year, partners can access premium discounts (up to 40%) with zero volume commitments—focusing solely on enablement, implementation support and active program participation requirements.

2.

Post-Year 1: Performance Criteria

Starting year two, tiered sales thresholds will be implemented beginning at \$250K annually for Gold and \$1M+ for Platinum, along with certification maintenance and customer satisfaction metrics.

Platinum Partner (40%)

Target: Strategic partners, MSSPs, enterprise solution providers

Requirements: Advanced technical certification, dedicated demo environment, consistent pipeline development

Benefits: Strategic co-selling opportunities, exclusive roadmap access, marketing development funds, executive-level business alignment

Silver Partner (20%)

Target: Referral partners, regional resellers, consultancies, specialized MSPs

Requirements: Comprehensive onboarding, foundational sales training, active portal engagement

Benefits: Complete sales enablement library, enhanced partner directory visibility, prioritized technical support

Distributor (10%)

Target: Value-added distributors, wholesale aggregators, channel ecosystem enablers

Requirements: Defined partner recruitment goals, multi-tier certification program, structured quarterly business reviews

Benefits: Advanced channel management platform, guaranteed deal protection, progressive volume rebates, comprehensive enablement resources for downstream partners

Platinum Partnership (40% Discount)

Strategic Alliance with Premier Benefits

Partner Responsibilities

Manage comprehensive deal lifecycle from lead generation through closing and customer retention

Orchestrate implementation process including technical validation, customer onboarding, and solution optimization

Deliver responsive L1 & L2 support services with established L3 escalation protocols

Foster joint market growth through advanced certifications, co-branded campaigns, and strategic marketing initiatives

Program Requirements

Achieve annual revenue threshold of \$2M+ in GuardDog AI solution sales

Maintain team of certified technical specialists ensuring comprehensive solution expertise

Participate in quarterly business reviews with collaborative strategic planning sessions

Demonstrate proactive pipeline management and consistent customer satisfaction metrics

Platinum partners enjoy unparalleled program benefits, including dedicated co-selling resources, priority marketing development funds, and executive-level sponsor alignment for strategic growth.

Silver Partnership (20% Discount)

Strategic entry point for consultants, technology advisors, and boutique service providers seeking value-driven collaboration without extensive integration commitments

Partner Responsibilities

- Identify and refer qualified enterprise opportunities to GuardDog AI sales organization.
- Engage in strategic co-selling initiatives where client relationships warrant direct involvement.
- Maintain opportunity pipeline visibility through partner portal engagement.

Program Requirements

- Execute standard partnership agreement and confidentiality protocols.
- Complete foundational sales enablement certification.
- No minimum revenue commitments required.

Executive Benefits

- Preferred pricing structure with 20% discount across all GuardDog AI solution portfolio.
- Enhanced marketplace visibility through partner directory placement.
- Comprehensive access to sales enablement resources and marketing collateral.
- Standard technical support channels and implementation guidance.
- Strategic co-branding opportunities to leverage GuardDog AI market position.

Optimized for consultative practices, specialized service providers, and technology advisory firms.

U.S. Volume Pricing Model

Our straightforward pricing is based on Protected Digital Assets (PDAs), making it easy to understand and scale with customer needs.

Volume	Price/PDA
1-9,999	\$100
10,000+	\$95
20,000+	\$90
50,000+	\$85
100,000+	\$80

Volume discounts apply at renewal as customer deployments grow, creating natural upsell opportunities for partners.

The tiered structure rewards scale while maintaining strong margins at every level.
Partners can leverage these volume discounts to create compelling multi-year proposals.

SPIFF Program – Designed to Drive Action

Deal Size SPIFFs

250+ PDAs	\$500 + \$2/PDA
1,000+ PDAs	\$2,500 + \$5/PDA
5,000+ PDAs	\$10,000 + \$10/PDA

Tiered payouts reward both deal volume and strategic wins, with immediate payout upon deal closure.

Special Incentives

Fast Start	2x SPIFF in first 60 days
Upsell / Add-on	\$250 + \$1/PDA
Competitive Takeout	\$3,000 bounty
Quarterly Top Seller	\$5,000 reward

Strategic focus areas earn premium rewards, encouraging partners to target high-value opportunities.

Get Started Today

Early adopters receive exclusive benefits, including enhanced SPIFF opportunities and priority technical support during the crucial launch phase.

Let's build a safer digital edge, together.

Case Studies & Testimonials

Andrew Hussain,

Vice President of Information and
Communications Technology

A.J. Ferguson,

Vice President - Membership Analysis
and Information Technology

Victors Schwarz,

President

"GuardDog AI's Complete solution has allowed us to easily and cost-effectively extend resources to remote locations while reducing risks in managing our existing solution. With healthcare cyber threats continuously evolving, having a strong system in place is crucial for protecting sensitive information and ensuring patient safety."

"Until we found GuardDog AI, the complexity and expense of other cyber security solutions was not working for our organization. The GuardDog Complete solution made it possible to evaluate vulnerabilities and take action. Without GuardDog, we were not able to keep pace with cyber threats. After installing GuardDog we went from being a reactive to a proactive company."

"GuardDog's Complete solution has been crucial in helping us extend our resources to remote and distributed locations across the country in a straightforward and cost-effective way. It also allows us to manage our clients' existing solutions nationwide"

Award Winning Analytics

GuardDog AI

**Delivering real-time protection where our competitors don't.
